

Pupil Voice – Year 3 and Year 4 Robotics Day – Wednesday 24th January

Name of Pupils: BA, AC, RR, SP

Question	Response
Did you enjoy the day and why?	BA – Yes because it was fun to make the robots RR – I thought it was fun and educational AC – I thought it was fun because we got make robots and I would like to do it again. SP – I think it was fun too because we could fix them all together and it was a competition
What was the best part of the day?	SP – Following the instructions because everyone had to do it and it was a lot of fun. AC – when we did the Sumo battle with the robots because it was really good fun. We used knex. RR – I liked the sumo wrestling aswell. BA – I liked decorating the robots with different tools for different reasons for example to push bottles off, keep on a track and for a battle.
What new skills did you learn?	BA – we had to work as part of a team SP – I learnt how to be in a team because I had to go with different people who were at different schools. It went really well as we worked together well. AC – I had to work things out such as finding rods to make it go higher. RR – I do a lot of robotics at my house but one thing I did do differently was that it was made out of knex rather than metal.
Give an example of when you had to solve a problem.	RR – During the sumo wrestlinh activity becuse not only did you have to attack and defend with shields you also had to stya on the track at the same time as making it heavier. AC – I found thr sumo activity a found because every time we did it It kept failing but then we won once. BA – When we had to get lots of pices that weren’t on our table and if they weren’t on another table, I had to search for them in other places.
Which of the 4rs did you demonstrate, give examples.	RR – reflective definitely because on our first go it failed and we had to keep on building it and improving SP – resourceful because we had look around for all of the materials because sometimes we didn’t always have enough. BA – reciprocal because we had to help each other and sort each other out and make sure everyone was taking part. SP – we had to keep going especially when we lost and it broke and then we had to make it better for the next

	round so we had to be resilient.
Would you recommend the day to other children?	All Yes RR – it was really challenging. BA – I would recommend it because it was fun and you get to help other children from other schools AC – I would recommend to others because it is fun and you get to work as a team. SP – it would good for different classes as they can learn new robotics skills
