History

Activity 1

How can a huge aeroplane full of passengers and suitcases fly in the sky?

Discuss this question, how do you think planes fly? What helps them stay up in the sky? See PowerPoint 1 and watch the videos below to find out how. As you are watching think about the first plane The Wright Brothers flew, how has the plane changed over the years?

tail
door
wing
jet engine
flight deck
fuselage

Activity 2

Think about how planes have changed over time, how has the invention of planes changed how people live?
What can we do because of the invention of the plane?

Write a sentences about how the invention of the plane has changed the way we live e.g. visit different places, learn about different countries and how they live, people can visit family or friends around the world, food, quick easy travel etc...

Extra activities:

Make your own paper aeroplane.

Make your own kite.

If you could go anywhere where would you go? Look at an atlas, find out about the country you would like to visit, write some facts about the country etc...

Pack a suitcase- what would you take?
