

Science- Plants

Activity 1:

Look at the wild plant PowerPoint, on your daily walk can you go on a wild flower hunt and do a tally to find the most common wild flower?

See wild flower hunt sheet.

Activity 2:

Look at in the garden PowerPoint, draw a picture of your garden or a garden you like to visit. Can you draw some flowers and label?

Art – printing

Activity 1

Look at the different repeating patterns- Think about where you might find repeated patterns around your house e.g. wallpaper, cushions, clothes etc...

Use the squares below to make your own repeated pattern, you can use one square to make the pattern or follow the pattern over the three squares.

Activity 2

Use everyday objects from the house or outside to create a repeating pattern. If a grown up takes part of the pattern out do you know what is missing? Or what will come before/after?
