# Look at PowerPoint 1

<mark>Activity sheet 1:</mark>

You can write your answers in your books or on paper. Just answer the questions that you feel confident with. I will send the answers out later in the week for you to check. Tweet me any questions and I will do what I can to help.

Question 1:

How many cubes tall is this table?
How many tens is this?

Question 2: Can you fill in the missing numbers? Can you spot a pattern? Practise counting forwards and backwards or starting from different points.
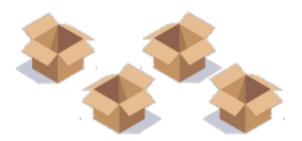

Choose a multiple of 10 can you say the previous number? Can you tell me the next number?
E.g. Previous multiple is 30   <mark>40</mark>   Next multiple is 50

0		20	30		50		70

If you counted back from 50 in tens, would you say 60? Can you explain?
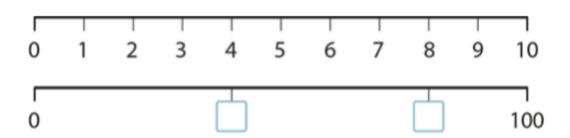

Question 3:

Each box will hold 10 teddies.

Does she have enough boxes to pack 50 teddies?

Look at PowerPoint 2

Question 1:

Using the number line - Can you write down the two missing numbers?

Question 2:

Estimate where these numbers would go on the number line.

50   10   90

Question 3:

Which multiple of 10 is this number?

0   ☐   100

Question 4:

'Where does seventy lie on this number line?'

0   50

'Where does forty lie on this number line?'

0   70
