

## Science- Seasons and plants

### Activity 1:

Watch the video <https://www.zeitraffer.tv/en/nature-time-lapse/seasons/time-lapse-cherry-tree-4-seasons-cherry-blossoming-flowering/>

Discuss the changes you can see? Write a sentence for each season e.g. In Autumn the leaves turn yellow.

Create your own season picture talk about the changes that happen, what happens to the weather? When do the days get longer/shorter? Can you order the months of the year and break them up into seasons.

### Activity 2:

Look at presentation about a sunflower, can you make a poster explaining the life cycle of a sunflower.

Challenge- what do plants need?

Extra activity - Look in your garden or local area when on a walk, what plants can you see?

Create a journey stick of different things you spot.

## Art – printing

### Activity 1

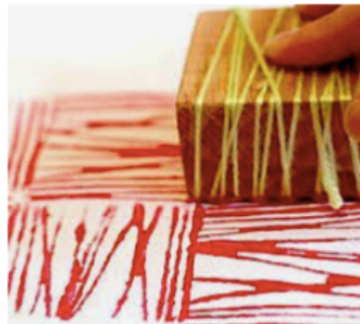

Our art focus for this term is printing, using things around your house or outside explore printing techniques using paint, ink, wax crayons. <https://www.bbc.co.uk/teach/class-clips-video/art-and-design-printmaking-different-materials/zhytscw>

Examples-

- flowers
- leaves
- duplo/lego bricks
- sponges
- fruit/potatoes
- tree bark
- use string to create a picture to print

Can you make a pattern?

Can you make your print symmetrical?

## Activity 2

Katherine Watson is a block printing artist- look at some of her art work below.  
Which is your favourite? Why?
