

## Year 2 home learning week commencing 20 April 2020

### Maths

We are continuing our learning about 2D (flat) shapes, by learning about quadrilaterals and right angles.

Go through the Maths PowerPoint for Week 2 before you do the activities below.

#### Activity 1

1. What is the same and what is different about these 2 shapes?

2. Fill in the table to say whether each shape is a quadrilateral (a shape with 4 sides) or not a quadrilateral. The first two have been done for you.

Shape	Is it a quadrilateral? (yes or no)
	<i>Yes</i>
	<i>No</i>
	
	
	
	

3. Miss Coope says 'all squares are quadrilaterals but not all quadrilaterals are squares.' Is she right or wrong? Explain your answer.

## Activity 2

1. Put a tick next to the shapes which have at least one right angles. If you can't print the page, copy the shapes which have right angles into your book.

2. Make a right angle finder using a scrap piece of paper. Go on a hunt for right angles in your home!

Draw and label 5 objects in your home which have at least one right angle.

My example:

This book has 4 right angles
